## Facts about Sedation Dentistry

- **IT IS SAFE!** You take a small pill prior to treatment., no I.V. needles.
  - It is effective!
  - You have little or no memory of the experience and you will not remember any sounds or smells.
  - You are completely relaxed for 5-6 hours after taking the pill.
  - Dental work normally requiring 6-8 appointments can be done in just 1 visit.
  - People who usually have difficulty getting numb have no problem when relaxed and asleep.
- 

## Commonly Asked Questions

Q. Will I feel any discomfort during the treatment?

A. No. You will not experience any discomfort.

Q. Will I be unconscious?

A. No, although you are in a state of deep relaxation.

Q. Will I be monitored?

A. Yes. Your vital signs are monitored with sophisticated equipment and one of our team members is always with you during the entire visit.

Q. How long will I be sedated?

A. From 2-6 hours depending on your needs.

Q. Will someone need to accompany me?

A. Yes. You will need someone to accompany you due to the relaxing effects of the sedation medication.

or more of these questions, then  
Sedation Dentistry is for you.***

## What is Sedation Dentistry & how does it work?

You are given a small safe pill to take at home 1 hour prior to your dental appointment. Your companion will accompany you to our office. When you arrive, you will be feeling very relaxed and drowsy. One of our caring team members will escort you to a very comfortable chair and provide you with a warm cozy blanket. We will begin to monitor your vital signs with sophisticated equipment. Our experienced team will take care of your dental needs while ensuring your comfort throughout your visit. When your treatment is complete, your companion will return you home to finish your relaxing sleep.
